THE TESTIMONY OF ONE OF OUR LAWYERS.—
I'Mr. JAS. L. HAMILTON—DEAR SIX: Although the number and sespectability of the testimonials of which you are already in possession, as to the efficacy of your Meticine. "THE GREAT VA. REMEDY" in the diseases which it is designed to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patromage as will adequately reward you for the discovery of so inestimable a Metheine—yet the great benefit which I have derived from its use, and the salutary effects which I have different from its umployment in the cases of several friends, to whom I had recommended it, constrain me to contribute, for much use as you may think proper to make of it, this formal acknowledgment of its sanitary virtues. My own case was Dyspepeia of long duration, and very aggravated in its claracter, manifested by an almost total destruction of the digestive functions, great debility, nervousness, appaciation and implaired apparents, with pain, and a burning generation in the left, side of the cheet, palpiaggravated in its character, manifested by an almost total destruction in the directive functions, great debility, nervousness, amediation with impaired appetits, with pain, and a burning sensation in the left side of the chest, palpitested of the head; and many other symptoms indicative of the worst type of the disease, by the use of three or four bottles of your preparation, been entirely relieved. The cases of my friends, in which your Medicine was taken, were Dyspesta, Charaic Headache, and Sore Throat, in all of which it proved effications, after the trial of a vast number of other remedies without benefit. Your medicine is as pleasant to the taste as a cordial, and in my experience corrects all denangement of the stomach, restores the wasted or enfective energies of the digestive organs, and imparts strength and reanimation to the whole system.

Very respectfully, yours, &c.,

English Common Law Reports,

58 Volumes, with a complete Index to the first 47 Volumes.
Since volume 39 of this series, The English Common Law
Reports have been reprinted in full. With volume 44, we
commenced binding enel English volume separately, instead of, as formerly, two English in one American volume.

Price—For the succeeding. 250 "

The reputation which these Reports maintain in England and in the United States is known to all the Profession. The low price at which they are offered, compared
with the rates of some of the principal American Reports,
of even inferior melli, recommends them particularly to
the attention of those purchasing Mibraries.

Mesers. T. & J. W. Johnson:
Gentlemen—In reply to your letter, I can with great sincerity say, that I entertain a very high opinion of the recent Exchequer Reports. In my judgment they are not recent Exchequer Reports.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court. I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and a Common Law, being entitled to equal respect with any others, in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours, SIMON GREENLEAP.

Law Library.

Fourth Scriet—Forty Volumes.

Twelve Dollars a year, bound—Ten Dollars in Numbers.

The cheapest Law Periodical in the United States.

It is our determination to make the Law Library the cheapest series of reprints of English Law publications in this country. The Editorial Department will, we trust, be found fully to realize the expectations of those who have enjoyed Smith's Mercantile Law, Touchstone, Broom's Legal Maxims, Archbold's Nist Prius, Archbold's Landlord and Tenant, Crable on Real Proporty, Smith on Contracts.

The high reputation which the "Law Library" has acquired throughout the United States, by the character of its volumes, and by the cheap rate at which its valuable contents have been presented to the Profession, is the best evidence we can offer of its merits and its claims for your support. We hope, and will alm, to retain this high character.

FURNISHING MAIL LOCKS AND KEYS.

Post Office DEPARTMENT,

March 14, 1851.

In desirable to substitute locks and keys of sorer kind for those now in use for the mail server with not be a substitute to the substitute locks.

than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the Department relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, proper to state that a lock suitable for the mail service should possess the following qualities, viz: durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all the mail locks and keys now in use, about thirty thousand use locks and keys now in use, about thirty thousand use locks and twenty thousand keysadapted thereto will be required to be furnished by the contractor within seven months after the contract shall have been entered into; afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be comsidered if it be like any already in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post Office Department. The kind of lock adopted must be patented, and the patentes will be required, on entering into contract, to make an assignment of his patent for the exclusive use and benefit of the Department, if the Postmaster General shall deem such requirement essential to the interests of the scritec. In case of the failure of the contractor at any time to fulfil faithfully the terms and conditions of his contract, the Postmaster General shall have the right of contracting with different individuals for such different reduced to annul said contract, and to contract on the right of contracting with different individuals for such different kinds of locks as he may select, and also the right to raject all the specimens and propo

* Elastic, because the keys recover their quieteent place in time equal to the displacing. Universal, because the same instrument may be instantly altered to any degree hard, or soft touch, so that ten thousand or mage performers, all different, may each find the touch they prefer.

COLD SPRING WATER CURE. THIS NEW AND SPLENDID ESTAB

so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and nurseries of the Measra Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embraring points of view, from which may be taken in at a glance the broad expanse of Lake Erie, the Ningara flowing majestically towards the Falls, extensive forests, and the "Queen City of the Lakes," with its moving panorama of steamboats and conselies enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a meat and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate seventy-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnastic exercises.

MEDICAL DEPARTMENT.

MEDICAL DEPARTMENT.

The institution is under the general supervision of S. M. Davis, M. D., Professor of the Theory and Practice of Medicine in Central Medical College, and Geo. W. Davis, M. D., formerly of Dansville, N. Y., the resident physician, and is permanently associated with the before mentioned gentleman as counsel, and associate of the medical board of control. And the friends of the establishment deem it a matter of felicitation that the services of Miss Mary M. Taylor, a lady of high medical attainments, who has attended two courses of lectures for the ternial Medical College, have been secured, and that female patients can at any time avail themselves of her invaluable side and counsel.

The steward's department is under the control of a gentleman eminently qualified for that position; and un wearled pains will be taken to have every thing appertaining to the establishment arranged on a plan, and conducted in a way, to ensure the comfort, and promote the health and happiness of all who may wish to avail themselves of its benefits. Baths of all descriptions, adapted to the cure of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has exercitable for the country.

of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An unlightened public sentiment has every where repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "laterum." A reuran from a wide and fatal departure from the subplicity of Nature's laws is called for, alike by a rational love of happiness and the deplorable extrences of our condition. Hydrogadhy, or a scientific use of water as a restorative and currily spent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugsing, depleting, and contexing, which, in obtaining the mastery over disease, too frequently photos the patient beyond the reach of further annoyance. The success of the various Water Cure establishments in this country, lo say nothing of any other, has fully confirmed the hopes of the early discoverers and promulgators of the great truths upon which the system is founded, and renders vertal communications unnecessary. It is deemed sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted erially inches of its a similar character, and will be found apull to the best, as regards the order, convenience, and designificaces of its arrangements. The institution is now open for the reception of patients, and in full operation.
